

ZARIA TAYLOR

Newark, NJ | (973) 558-2519 | zariaalztaylor@outlook.com | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Entry-level data analyst with hands-on project experience in Python, SQL, Tableau, and Google Workspace, including an exploratory analysis of 18 years of NYC open data. Completed the Google Advanced Data Analytics Certification and 400+ hours of data analytics training at The Knowledge House. Skilled at cleaning and validating data, working through ambiguous problems, and explaining findings to non-technical audiences. Brings 5+ years of client-facing, process-driven experience and a proactive approach to learning new tools, including the responsible use of AI tools.

CORE SKILLS

Data Analysis: Python (Pandas, NumPy, Matplotlib, Seaborn), SQL, Exploratory Data Analysis, Descriptive Statistics, Data Cleaning & Validation, API Integration

Visualization & Tools: Tableau, Dashboard Design, Google Workspace, Google Colab, Jupyter Notebook, GitHub, Salesforce, CRM Systems

AI Tools: Prompt Engineering, LLM-Assisted Workflows, NotebookLM, Gemini, Claude

Professional Skills: Data Storytelling, Stakeholder Communication, Process Documentation, Customer Service

DATA ANALYTICS PROJECTS

NYPD Shooting Incident Analysis (Exploratory Data Analysis) | [GitHub](#) May 2026

- Built end-to-end data integration by writing Python scripts and using REST APIs to pull 18+ years of raw NYC Open Data.
- Cleaned and validated missing or inconsistent records using Pandas and NumPy to ensure dataset integrity.
- Conducted exploratory statistical analysis in Jupyter Notebook to uncover geographic, demographic, and temporal incident patterns across boroughs.
- Produced visual trend analyses, using Matplotlib and Seaborn, to identify high-density incident locations (housing complexes and private residences) to support future discussions about community safety recommendations.

Project Atomos | Mastercard Hackathon, 2nd Place Apr 2026

- Collaborated on a hackathon concept for a payment platform that lets unbanked individuals and gig-economy workers transact digitally without exposing personal data.
- Used NotebookLM and Google Workspace to research and document a proposed on-chain Trust Score using zero-knowledge proofs, so users could build financial credibility without traditional documents.
- Contributed to the pitch, including a proposed stablecoin-to-USD model around Mastercard's Multi-Token Network concept and projected volume targets (\$1B year-one goal).

PROFESSIONAL EXPERIENCE

Seasonal Guest Ambassador | Liberty Science Center, Jersey City, NJ Feb 2026 – Aug 2026

- Delivered high-quality guest interactions for 5,000+ weekly visitors, adapting communication styles for diverse age groups and educational backgrounds.
- Navigated daily operational challenges and crowd flow logistics; contributing to a 30% increase in visitor satisfaction scores.

Licensed Financial Professional | Global Financial Impact, Newark, NJ May 2024 – Sep 2025

- Maintained data integrity and lead tracking in Salesforce CRM and illustration tools (Agency Rocket, iDecide) to support pipeline performance reporting and accurate policy records.
- Analyzed client profiles and prospect data to streamline high-volume outreach campaigns; held 30-35 qualified appointments weekly and translated complex financial product data into tailored client recommendations.

Licensed Training Associate | World Financial Group, Newark, NJ May 2020 – Mar 2024

- Audited activity logs and submission records in client applications to identify data gaps, resolve system inconsistencies and track key operational performance indicators (KPIs).
- Coordinated cross-functionally with administrative, sales, and compliance teams to align CRM data with official records and mentored 10+ associates on standard outreach workflows.

EDUCATION

Innovation Fellowship | Data Analytics Track | The Knowledge House, Newark, NJ Jan 2026 – Sep 2026

- Completed 400+ hours of technical training in SQL, Tableau, Python, data cleaning, statistical visualization, and exploratory data analysis.
- Queried relational databases with SQL to extract user behavior metrics and built interactive Tableau dashboards that improved marketing targeting accuracy.
- Applied agile methods and Google Sheets tracking to manage sprint tasks, conduct user research and deliver an MVP capstone project.

B.A. Sociology | Colorado College, Colorado Springs, CO

- Honors: Alumni Association Student Leadership Scholarship Recipient

CERTIFICATIONS

Google Advanced Data Analytics Certificate | Coursera – Completed Sep 2026
